WORK EXPERIENCE

01/04/2019 – CURRENT – Bucharest, Romania

WEB ENGINEER – EMAG

One of the top e-commerce platforms from Romania. Tens of thousands of customers order from us daily, and we manage to offer each of them a memorable experience. How do we manage to achieve this? By understanding the customer, by having the mindset of a successful entrepreneur, by assessing the impact of our projects, by acting responsibly, and by growing with the business. There are, in a nutshell, the eMAG Principles. These define us and help us become our favourite shopping destination.

The TSL (Target, Search, and Listing) Team is passionate about technology and education, and it is their #1 priority. It is my #1 priority to bring the best search experience to the shop. Being part of a central role in the innovation and technology team, we support the development and growth of the business in a rapid manner. I focus on efficiency and fast features integrations of each country that we act in.

01/01/2018 – 01/03/2019 – Ploiești, Romania

WEB ENGINEER – NETGAS RESEARCH & DEVELOPMENT SRL

An R&D organization developing judgment engines, in the form of software applications, as well as practical methods, which, through integration into the daily life of the customers, help them become safer and economically more efficient. They develop their software products by marrying engineering, operational, business, and analytics principles and knowledge, at the spear tip of Industrial Internet of Things and Industry 4.0 initiatives. They develop their implementation and operationalization methods with an attentive focus on principles of minimal invasion into the current operational environment of their customers and fast benefit gains.

I chose to work at NetGAS because it is an organization that knows very well the industry specifics, business processes, technical aspects, enabling operators and teams to focus on the most critical set of priorities. They address technical process optimization, business process optimization, costs minimization, performance improvement, and integration of data and applications.

Working in an organized, agile environment with a young team, I designed logical schemes, built applications and diagrams for different industrial solutions using YII2, Angular 5/6, and MySQL.

Main Tasks:
-Developing web applications using web frameworks like YII2, Bootstrap 4, and Angular 5/6
-Design and modify the structure of databases using MySQL and/or SQL Server
-Test and analyse the proper functioning of the applications
-In charge of the network infrastructure of the company. I was responsible for the upkeep, configuration, and reliable operation of computer systems; especially single-user computers, such as servers.

01/09/2017 – 28/10/2018 – Ploiești, Romania

WEB PROGRAMMER – XIDIA NEO S.R.L (HDESIGN)

A web-based agency was set up in 2008, and since then they have specialized in all the web segments, and today they offer all the services needed in one place. During the internship, I started learning web technologies, from how to build a database to how to implement a fully functional website.

Tasks:
- Web application development in PHP
- Implement responsive webpage layouts using HTML5, CSS3

- Managing databases in MySQL
- Constantly interact with an open-minded people
- Identifying bugs and flaws in the code

INFORMATICS – Petroleum-Gas University of Ploiești

https://www.upg-ploiesti.ro

LANGUAGE SKILLS

Mother tongue(s): **ROMANIAN**

Other language(s):

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
ENGLISH	B2	B2	B1	B2	B1
FRENCH	A1	A1	A1	A1	A1

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

DIGITAL SKILLS

My Digital Skills

PHP Language | Programming Languages: Java, C, Kotlin, C#, Javascript | Solr, Elasticsearch | Lucene | Databases, SQL and NoSQL | Programming languages (Python and R program) | Graph DBs (RDF, Neo4j)

PROJECTS

02/01/2020 – 08/05/2021
Semantic Search Engine

https://github.com/mihaichris/n8-engine
The project was a search engine for Semantic Web ontologies, documents, terms and data published on the Web. The project, named N8 employed a system of crawlers to discover RDF documents and HTML documents with embedded RDF content. N8 reasoned about these documents and their constituent parts (e.g., terms and triples) and recorded and indexed meaningful metadata about them in its database.

01/01/2018 – 05/03/2019

Microtransactions Blockchain

https://github.com/mihaichris/pandora
A small blockchain made with Python that I made as the final exam.

03/03/2021 – CURRENT

BVB Client

https://github.com/mihaichris/bvb-client
This is BVBClient, a PHP library built for investment management and analysis of security returns targeted only for Bucharest Stock Exchange.

VOLUNTEERING

01/04/2015 – CURRENT

Crew Member

Ploiești, Prahova
Prahova IT Community is a young non-profit organization that aims to facilitate the development of IT skills and knowledge of all its members. Until now we had a couple of successful workshops that got us more enthusiastic people in our team.
If things are good in the future we will be a fully voluntary organization.
